Introduction to Bayesian Analysis in Stata

Stata has two system variables that always exist as long as data is loaded, `_n` and `_N`. `_n` basically indexes observations (rows): `_n = 1` is the first row, `_n = 2` is the second, and so on. `_N` denotes the total number of rows. To illustrate, let's use `stocks.dta`. This portfolio contains 32 observations.
